Manitoba's total population was estimated at 1,182,921 persons as of April 1, 2007, up 2,917 persons from the January 1, 2007 estimate. Population growth continues on an annual basis, with Manitoba's increase since April 1, 2006 estimated at 6,973 persons, or 0.59%. A large portion of Manitoba's estimated population gain of 6,973 persons over the past 12 months was the result of immigration (10,194 persons). The immigration flow of 10,194 from April 1, 2006 to March 31, 2007 is the best since at least the April 1, 1972 to March 31, 1973 period.

We recorded an estimated net loss of 228 persons from other provinces through interprovincial migration in the first quarter of 2007, an improvement of 1,406 persons from the net loss of 1,634 persons in the first quarter of 2006.

Interprovincial migration is generally offset to some degree by other types of population movement (international migration, Canadian citizens returning from abroad, non-permanent residents and Canadians temporarily abroad). When these other forms of population movement were combined with interprovincial migration, Manitoba recorded an overall net migration gain of 2,091 persons in the first quarter of 2007. This net gain of 2,091 persons marked an improvement of 1,673 persons from the net migration gain of 418 persons in the first quarter of 2006.

Net international migration for the first quarter of 2007 was 2,065 persons, up from 1,912 persons in the first quarter of 2006. This improvement is due to the increase in immigration that went from 2,159 persons in the first quarter of 2006 to 2,313 persons in the first quarter of 2007.
